Robin Geral

Full-Stack Software Engineer · Engineering Team Lead

Lyon, France +33 6 35 52 43 28 rgeral.pro@gmail.com rdevs.fr linkedin.com/in/robin-geral github.com/rgeral

SUMMARY

Passionate, self-driven full-stack software engineer with a non-traditional background, strong curiosity and a constant drive to learn. 2+ years building and shipping web applications with Java/Spring Boot, Angular and React, now leading a 6-person agile team on a GDPR-regulated e-voting product. Owns work end to end, from design and build to shipping and running it in production, with a solid foundation from 42 School (Master's-level, IT Architecture) and years of hands-on team leadership before tech.

SKILLS

Languages: Java, TypeScript, JavaScript, Rust, Python

Backend: Spring Boot, Node.js, Axum, GraphQL

DevOps: Docker, Kubernetes, Helm, ArgoCD, Jenkins, XLDeploy, GitHub Actions, NGINX

Practices: Agile/Scrum, code review, Clean Code, CI/CD

Frontend: Angular, React, React Native, Svelte, Next.js

Databases: PostgreSQL, MariaDB, SQLite

AI: Agentic workflows, sub-agent architectures, Claude Code, prompt engineering, machine learning

Spoken: French (native), English (B2, upper-intermediate)

PROFESSIONAL EXPERIENCE

Software Engineering Team Lead — Jan 2026 – Present

SLIB – Secure electronic voting (e-voting) solutions *Spring Boot · Angular · PostgreSQL · Docker*

Lead a 6-person engineering team, driving agile development and proactively modernizing technical workflows across the company's e-voting products.

- **Team & delivery management:** Oversee sprint planning, ticket lifecycles and resource allocation across multiple concurrent projects.
- **High-compliance delivery:** Led the architecture and development of a new secure online voting platform built under strict GDPR and data-privacy constraints.
- **DevOps & CI/CD:** Delivered a proof of concept for a new deployment pipeline with Kubernetes, Helm and ArgoCD.
- **AI tooling:** Built AI agents, including sub-agent architectures, that automate recurring workflows and standardize documentation.

Full-Stack Software Engineer (Apprenticeship) — Jan 2025 – Jan 2026

SLIB – Secure electronic voting (e-voting) solutions *Spring Boot · Angular · PostgreSQL*

Took full technical ownership of building a web application from scratch, with high autonomy, driving its architecture and deployment.

- **Full-stack development:** Designed and built a responsive, scalable application from the ground up using Angular and Spring Boot.
- **Architecture:** Made the core architecture decisions and proposed innovative solutions to meet product requirements.
- **Release ownership:** Owned the release and deployment process to production.

Full-Stack Software Engineer (Internship) — Aug 2024 – Jan 2025

Bill – Point-of-sale and transaction systems for restaurants *React · Node.js · MariaDB*

Worked on the client-facing applications behind restaurant checkout and transaction systems, within a microservices architecture.

- **Maintenance:** Resolved defects and built new features for client-facing apps in a microservices ecosystem.
- **Agile:** Worked in Agile workflows with day-to-day ticket resolution.
- **Standalone build:** Built an app from scratch to track and manage customer wait times for a drive-thru queue system.

PROJECTS & HACKATHONS

Chess Club – Self-hosted full-stack chess game chess.rdevs.fr

Svelte · Rust (Axum) · GraphQL (async-graphql) · SQLite · Docker Compose · NGINX · GitHub Actions · WireGuard

- Integrated the Stockfish engine over UCI, with difficulty tuned through skill level, think time and deliberate imperfection.
- Deployed and operate it on a home server with Docker Compose, NGINX reverse proxy, CI/CD via GitHub Actions and WireGuard VPN.

Drone Detection – European Defense Hackathon (Synteza-1 challenge) github.com/Rgeral/hackatonParis

YOLOv8 · Python · Next.js

- Trained a YOLOv8s model for drone detection and built a Python processing pipeline in a single sprint.
- Built a Next.js dashboard with a live map and real-time alerts.

MetaCulture – XRPL Commons Hackathon github.com/Rgeral/MetaCulture

XRPL · React · Node.js · Pinata · Predibase · Docker Compose

- Built an NFT-gated cultural experience where an XRPL NFT acts as the access token, with Xaman wallet sign-in or email fallback.
- Integrated an AI guide trained on an artist's data, served through Predibase.

Aléas – Randomized improvisation theater show · Next.js, TypeScript, DMX512 lighting

EDUCATION

42 School | Master's Degree in IT Architecture (RNCP Level 7 – U.S. Master's equivalent) **2021 – 2024**

ADDITIONAL EXPERIENCE

Military Paratrooper | French Army, 3e RPIMa (Marine Infantry Parachute Regiment) – Carcassonne, France **2020**

Trained in infantry combat fundamentals and survival techniques; developed rigorous teamwork, discipline and resilience under pressure.

Co-Owner & Manager | Bar-Restaurant L'Aventure – Hautefort, France **2015 – 2018**

Ran a small business end to end (operations, finances, service) and managed a team of 4 employees with diverse profiles.

Shift Leader | McDonald's – Paris, France **2013 – 2015**

Progressed from Crew Member to Shift Leader; responsible for daily cash deposits, supervised multiple work stations and trained new staff.
